Guy’s and St Thomas’ NHS Foundation Trust

Admission Avoidance
Improving patient safety through care and compassion

An inter-professional course combining low & high fidelity simulation to explore human factors and how to safely care for residents avoiding unnecessary hospital admission.

This course is for healthcare practitioners supporting patients across the residential and community care pathway.

It offers the chance to practice, in a safe environment, the real-life skills needed to care for patients / residents whom experience deterioration in conditions that may require nursing, medical or even hospital care.

Suitable for GPs, community nurses & therapists and residential care staff.

1.5 Day Course
3rd & 4th March 2015
6th & 19th March 2015
